JUST 4.5 CM TO CONVEY BEAUTY

LED illuminated frames with decorative or simple profiles encompassing all of the technology needed to enhance shapes and colours. The light passes through the image, adding depth and luminosity, transforming it into a splendid decorative picture.

Attention to detail and **Italian production quality** combine with the emotional richness of colour enhanced by a light that is unique in the world

The **Unica backlit panels** have been created with the aim of revolutionising display advertising, revealing the astounding creative potential offered by backlit frames in interior design.

Production flexibility, combined with the utmost reliability of the components and simplicity of use, make products from the PH and PHF collections valuable allies for residential as much as for retail space design projects..

SPRING-FIT: DYNAMIC VISUAL COMMUNICATION

True design is that which serves a purpose, brilliant ideas that improve life concealed in an apparently simple object.

The **Spring-fit system** was created under that premise.

The system is designed to enable the replacement of images in backlit panels and frames with a push of the hand.

The backlit panel is no longer a simple advertising tool, it has become a more **dynamic and versatile furnishing element** capable of enhancing photographs and digital works of art.

PH collection

The new dimension of images

Design: **Cantoni**

Essential lines, minimum thickness, the image is made of passing light: the PH line allows to design dynamically-furnished spaces where light and colour provide a new imaginative dimension.

Linear and bright aluminium profiles including in just 4,5 cm all the technology needed to light the images printed on Backlite.

PH collection

Design: **Cantoni**

Slimline panel, just 45 mm thick, with LED backlighting, integrated power supply unit and pre-fitted wall hook. Equipped with the exclusive Spring-fit system, offering an easy solution for image replacement. Standard and made-to-measure sizes. Easy to install.

Ideal for store display communication. Perfect to create evocative atmospheres in residential spaces. too.

- . Crush proof structure in anodised aluminium
- . White Led Strip: Power consumption 9.6W / mt
- . Side on/off switch integrated into the profile
- . Replaceable image (Spring-fit system)
- . High-resolution print on backlit film
(post sales service available too)

PH panel 1035x1835 mm

The perfect gradation of light creates a comfortable and evocative atmosphere. Thanks to their distinctive modular design, PH panels are versatile objects suitable for decorating and furnishing various environments, including residential. The printed image is chosen by the customer, who can easily replace the image with another whenever they wish with no need for assistance.

FURNISH THE BEDROOMS

PH panel 1235x1835 mm - 1235x1635 mm

PH REED 1035x1835 mm

PH Reed

Design: **Cantoni**

For the freestanding version, the PH backlit panel is equipped with a post and support foot in anodized aluminium and the back of the frame is ready for connection to the same.

The freestanding version can be completed with methacrylate shelves. Panel and support for the free standing version are available in standard sizes or made to measure.

- . Profile and support in silver anodized aluminium
- . Side on/off switch integrated into the profile
- . Spring-fit system to replace the image
- . High-resolution print on backlit film (post sales service available too)

Perfect for advertising in commercial spaces, exhibitions, window displays and anywhere where promotional corners and temporary beauty stations are required.

Low energy consumption means they can be left on night and day.

The absence of an external power supply unit and subsequent ease of installation make them ideal for enhancing and reinforcing marketing communications..

MPH collection

A revolution in communication displays

Design: **Cantoni**

The Iconic wall-mounted mirror is built into glass with a colour backprinted image. The entire panel, enclosed in a silver anodized aluminium profile, is given special emphasis by LED backlighting. The backprinted image could be an advertisement or an evocative image, making it equally suitable for adding the finishing touch to a commercial or residential space.

Backlit panels decorated with integrated mirror:
an effective tool for the beauty industry that is also an effective medium for in-store brand awareness.

- . Customised image backprinted to glass at high definition
- . Glass thickness 4mm
- . Highly resistant mirror 600x600mm
- . I-light lights with adjustable brightness and colour gradation 4200° kelvin.
- . Front actuator for I-light lenses (Mod. MPH10)
- . Safety film
- . Integrated power supply unit
- . Low energy consumption
- . Anodized aluminium profile 45 mm

*Example of customised creation

PHF collection

Flexible tailor-made emotions

Design: **Cantoni**

Framed backlit panels from the PHF range add intensity and magic to images of the highest quality printed on translucent film, creating pictures with the most incredible depth and beauty.

This collection makes custom design its distinctive feature.

We have chosen the warm embrace of natural materials crafted with passion to delicately enclose the emotions conveyed by your most treasured images. These objects bring to life the concept of modern luxury that lies at the heart of the entire Unica range.

SPRING-FIT: DYNAMIC VISUAL COMMUNICATION

Il vero design è quello a servizio delle persone, quello che cela, in un oggetto apparentemente semplice, idee geniali che rendono migliore la vita.

The Spring-fit system was created under that premise.

The system is designed to enable the **replacement of images** in backlit panels and frames **with a push of the hand**.

The backlit panel is no longer a simple advertising tool, it has become a more dynamic and versatile furnishing element capable of enhancing photographs and digital works of art with elegance, style and simplicity.

TECHNICAL SHEET

STRUCTURE

6060-T5 non-deformable aluminium

- . Min. size 450 mm
- . Max. size 1835 mm

LIGHTED PANEL

Acrylic sheets with a high level of light emission, designed to enhance image brightness thanks to pure, high-luminosity and high-diffusivity light sources that render colours with high visual uniformity.

REAR PANEL

Composite panel made up of two aluminium sheets with a polyethylene core.

LIGHT SOURCE

- . LED Strip 120/m
- . Colour temperature: 5500° K
- . Rated output: 9.6W per metre
- . Voltage: 240 V AC
- . Side on/off switch
- . Integrated transformer

The light source contained in this equipment may only be replaced by the manufacturer, its service department or equivalent qualified personnel.

Device for indoor use only, IP20

All products by Cantoni are made in Italy with carefully selected materials.

Each product is the result of a careful study to ensure the best balance between aesthetics and technology.
The authenticity of each piece by Cantoni is ensured by our trademark.

We are always available to respond to every request and question about products.
Our technical department is then available for custom projects
